## METHOD OF MAKING A CONDUCTIVE DOWNHOLE WIRE LINE SYSTEM

the specification of which

 is attached hereto. was filed on \_\_\_\_\_ as reissue application number \_\_\_\_\_

(if applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verify believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

- by reason of a defective specification or drawing.
- by reason of the patentee claiming more or less than he had the right to claim in the patent.
- by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

This reissue is a broadening reissue. The nature of the broadening is by way of the correction of the above-identified error. In particular, the reissue is broadened to the extent that claims 25-33 are newly added by way of a preliminary amendment. Claims 25-33 are directed towards a conductive wire line made of a small diameter tubing having one or more optical fibers extending through the tubing in a helical configuration. The subject matter of claims 25-33 was not claimed under the issued claims of Patent No. 6,148,925.
